EDUCATION **Carnegie Mellon University**, Pittsburgh, PA

Ph.D. in Machine Learning

August 2013 - May 2019

▷ Advisor: Seyoung Kim

GPA: 3.80

▷ Selected Courses: Probabilistic Graphical Models, Convex Optimization, Foundations of Machine Learning Theory, Graduate Molecular Biology

University of Michigan, Ann Arbor, MI

Bachelor of Science in Engineering

August 2009 - May 2013

▷ Major: Computer Science, Minor: Mathematics

GPA: 3.98

▷ Selected Courses: Operating Systems, Computer Architecture, Database Systems, Numerical Methods, Linear Algebra, Theoretical Statistics

EXPERIENCE **Lightmatter**, ML Scientist

January 2021 - Present

Researching ways to accelerate deep learning inference on custom photonic hardware, and to make model accuracy robust to noise and quantization. Helping guide development of next generation of hardware based on analysis of current results.

Tempus Labs, ML Scientist

June 2019 - January 2021

Created a new domain adaptation method that accounts for confounders, which was deployed on the Tempus RNA-seq pipeline as the source-of-truth for all clinical AI models and pharma data deliveries. Developed a new topic model for gene expression deconvolution in metastatic cancers. Explored network learning methods and graph neural nets for gene expression networks and chromosomal rearrangement graphs.

Carnegie Mellon University, PhD Student

August 2013 - May 2019

Worked on sparse graphical model learning problems and scalable optimization algorithms for tasks in systems biology. My focus was on using statistical machine learning to discover the gene regulatory networks which explain the effect of genetic variation on clinical traits.

Van Andel Research Institute, Research Intern

Summer 2013

Worked under the supervision of Brian Haab to apply feature selection method to pancreatic cancer biomarker discovery and to validate method on proteomics database.

Google, Software Engineering Intern

Summer 2012

Worked on server backend for Google Flight Search, developing functionality to improve quality of results for live Flight Search queries.

University of Michigan, Research Assistant

Winter - Fall 2011

Worked under the supervision of Valeria Bertacco and Debapriya Chatterjee to develop post-silicon validation method. Designed and implemented parallel algorithm in CUDA.

Arbor Networks, Summer Intern

Summer 2011

Implemented instrumentation in deep packet inspection system and prepared performance analysis tools geared to IPv6 transition.

University of Michigan, Research Assistant

Summer 2010

Analyzed data from simulated advertising auctions under the supervision of Michael Wellman to understand impact of bidding strategies on advertiser profitability.

SELECTED OPEN-SOURCE CONTRIBUTIONS	onnx2pytorch	https://github.com/ToriML/onnx2pytorch
	Converts ONNX models to PyTorch.	[main contributor]
	PerturbNet	https://github.com/SeyoungKimLab/PerturbNet
	Learns multi-omic gene regulatory networks.	[main contributor]
	MLPerf Inference	https://github.com/mlcommons/inference
	Deep learning benchmark.	[memory-efficient pyramidal encoder for RNN-Transducer]
	matrix-completion	https://github.com/tonyduan/matrix-completion
	Classical matrix completion.	[incremental singular-vector thresholding]
	PyTorch	https://github.com/pytorch/pytorch
	Deep learning framework.	[added LazyInstanceNorm]
TEACHING	nanopq	https://github.com/matsui528/nanopq
	Product quantization (PQ) and optimized PQ.	[eigenvalue allocation initialization]
	<i>Probabilistic Graphical Models</i> (Teaching Assistant)	Spring 2016
	<i>Introduction to Machine Learning</i> (Teaching Assistant)	Fall 2015
ACTIVITIES AND PROFESSIONAL SERVICE	<i>Paper reviewing</i>	June 2016 - Present
	Reviewer for <i>NeurIPS</i> , <i>IEEE Internet of Things</i> , <i>Statistics and Computing</i> , and <i>SciPy</i> .	
	<i>University of Michigan Robocup (Robot Soccer) Team</i>	2009 - 2012
	Member and team leader (2010-2011). Developed computer vision subsystem.
